ROHAN RAJ RAHUL

Student

ABOUT ME

Electrical and Electronics Engineering graduate from NITK Surathkal with a strong interest in migration, refugee law, public policy, and interdisciplinary research. Aspires to examine migration governance and legal frameworks through the intersection of technology, law, economics, and society, contributing to evidence-based policy research and institutional initiatives addressing complex social and governance challenges.

EXPERIENCE

Member

Utkrishta Bharath Club, NITK Surathkal — oct '25-may '26

Participated in initiatives promoting Indian culture, heritage, and cultural awareness. Contributed to fostering cultural appreciation, student engagement, and a sense of shared heritage within the campus community.

Internship Project

NITK ,Surathkal — may - july 2026

Developed practical AI-based applications using Agentic AI frameworks, including LangChain, LangGraph, and LangSmith. Gained hands-on experience in building AI agent workflows, integrating tools, developing full-stack applications, and deploying real-world AI-powered solutions.

Tirthofy: An Integrated Pilgrimage SuperApp

Major Project - II — May 2026

Engineered Tirthofy, a full-stack religious tourism platform using Flutter, Node.js, Express.js, and MongoDB. Integrated Gemini AI, RESTful APIs, JWT-based authentication, Socket.IO, Kafka messaging, Razorpay payment workflows, Redis caching, Firebase services, and Cloudinary media storage, with modular backend architecture, role-based access control, and cloud deployment.

The Tirthofy Trails

Major Project - I — Dec 2025

Developed Tirthofy, a Flutter-based religious tourism super-app using Clean Architecture and Provider state management. Integrated Firebase Authentication and Cloud Messaging, Google Maps Platform APIs (Places, Directions, Geocoding), and RapidAPI for travel services, alongside Gemini AI, REST API integration, and personalized pilgrimage itinerary generation.
